

BOILER

BOILER

Features

- Boiler units consist of small tanks with sheath heaters inside which are welded to the tanks
- Tanks are available in two types: closed type and open type

Application examples

- Coffee makers, small calorifiers, and water servers
- etc

Precautions

- These heaters mainly use high-output heaters and require proper devices to prevent heating without liquids

Pipe material	Tank material	Proper environment	Max. withstand pressure
INCOLOY840	SUS304	Liquid heating	40BAR
INCOLOY800	SUS304L	Liquid heating	40BAR
SUS316L	SUS436	Liquid heating	40BAR
