

PET Heating Film

PET Heating Film

To print the carbon slurry on PET film to be heating layer, and vulcanized the PET film to be insulated layer.

Features

- To print the carbon slurry on PET film to be heating layer, and vulcanized the PET film to be insulated layer .
- Voltage : 240V .
- Power : 1000W(It can be customized) .
- Max watt density : 0.3W/cm²(Over 0.3W/cm², need to assemble temperature controller) .
- Usage Temperture : 100°C Max .

Application examples

- Keep Warm · Preheat °
- etc °
