INTRODUCTION

INDEECO offers commercial and industrial electric heating and control systems that set the industry standard for excellence. The company's heating solutions reflect more than 85 years of innovation, product quality and efficient service.

INDEECO's line of Comfort Heating Products cover a wide range of commercial and industrial applications. Whether the requirement is for architectural wall

heaters, cabinet unit heaters, convector heaters or ceiling heaters, INDEECO has a product to match the application.

INDEECO's quality is matched only by its customer service and support. With its quick-ship delivery program, INDEECO provides the products you need.

WAI SERIES

Architectural Wall Heater

The WAI fan-forced wall heater is designed for commercial and industrial areas requiring higher KW ratings and quick recovery. The unit provides a burst of heat in areas affected by cold drafts or wide temperature swings.

- **Efficient Operation:** The fan draws air into the top of the grille and discharges warm air downward to distribute heat and keep floors warm and dry. High CFMs create air circulation within the room to provide uniform temperatures.
- **Extended Capacity:** The WAI is available with one, two or three modules and ratings up to 12,000 W and 480 CFM.

- Garages
- Guard Houses
- Offices
- Reception Areas
- Restrooms
- Stairwells
- Vestibules

Standard Construction Features

Heating Elements – Steel finned tubular elements.

Outlet Grille – The WAI has an architectural extruded aluminum grille in a choice of seven epoxy/polyester powder paint finishes. The closely spaced, heavy bar grille design prevents insertion of foreign objects. The tamperproof thermostat adjustment is concealed behind the front cover.

Built-in Controls – Automatic reset thermal cutout, over-temperature warning light, fan override and tamperproof thermostat.

Fan Motor – Permanently lubricated, totally enclosed motor. The single unit has a 160 CFM fan (55 dBA), double unit has 2 x 160 CFM fans (58 dBA), and triple unit has 3 x 160 CFM fans (61 dBA).

Installation Requirements – Heater must be installed at least ten inches from the floor and adjacent walls.

EWI SERIES

European Style Wall Heater

(Shown with optional thermostat & timer)

The EWI wall heater has a stylish, contemporary design with rounded corners and soft lines for an elegant appearance. This heater is ideal for areas with space restrictions and high heating requirements.

- **Unique Element Design:** Stitched ribbon-type heating element provides instant heat for areas that need to be warmed quickly.
- **Three Models:** The standard single-stage heater is controlled by an optional remote line-voltage thermostat. Heater type **T** has a single-stage built-in thermostat. Heater type **TZ** is furnished with an additional 0-60 minute mechanical timer that provides manual operation at maximum wattage during occupied periods, then resumes normal control.
- **Installation Flexibility:** The heater can be recessed in a 2-inch by 3-inch stud wall or surface mounted without the use of adapters.

Applications

- Entryways
- Reception Areas
- Fire Station Changing Areas
- Restrooms

WLI SERIES Wall Heater

The WLI wall heater is designed for recessed mounting into shallow 2-inch by 3-inch stud walls. It provides heat in a quiet, efficient manner. Single units can heat small areas and multiple heaters can be used in large or odd-shaped rooms.

- **Mounting Options:** Units can be surface (with optional box) or recessed mounted, vertically or horizontally, in one of four positions. A tapered recess box assures a tight fit when mounted into the wall.

Applications

- Breezeways
- Small Offices
- Entryways
- Storage Rooms
- Restrooms

CUI SERIES Cabinet Unit Heater

The CUI cabinet heater offers a unique combination of quality, efficiency, reliability and flexibility. The attractive cabinet design blends into any commercial decor.

- **Mounting Options:** The cabinet heater can be mounted on the floor, wall or ceiling. It can also be recessed into the wall or ceiling as required. Twelve air inlet and outlet combinations are available.
- **Simplified Maintenance:** The insulated front panel is hinged to allow for easy access.
- **Quiet Operation:** The blower wheel is mounted directly on the motor shaft to reduce the noise level.
- **Fresh Air Inlet:** Manual or optional power-operated inlet allows fresh air to enter through the rear of the heater and mix with re-circulated room air.

Applications

- Classrooms
- Hallways
- Meeting Rooms
- Lobbies
- Stairways
- Corridors
- Waiting Rooms
- Entry Ways

Standard

Standard Construction Features

Heating Elements – Industrial grade steel finned tubular elements.

Housing – Cabinet is constructed of 18-gauge steel with an epoxy/polyester powder paint finish in white or almond.

Outlet Grille – An extruded architectural style aluminum grille discourages tampering with the heating element. The grille can be field converted for front or top air discharge.

Built-in Controls – Automatic reset thermal cutout and fan delay. Power fusing is supplied for heaters over 48 amps.

Fan Motor – The squirrel cage fan is beltless and two-speed, operating at 48 dBA at low speed and 50 dBA at high speed. Fan motors have permanently lubricated sleeve bearings for trouble-free service.

Installation Requirements – For best performance, do not install cabinet heaters above recommended maximum mounting height of ten feet.

Rough In Dimensions – Recess mounting only: Heater Length + 1" wide x 27" high x 12" deep.

(1) To obtain the minimum ratings it is necessary to add the optional "N1" two-speed motor with high/low switch for manual operation or option "N2" two-speed motor with high/low relay-24 volt. The "N2" can be connected to a remote two-stage, wall-mounted thermostat or field furnished low voltage device for maximum/ minimum control.

(2) Total Amps = Heating element amps and motor amps.

Standard colors - Add W for white finish or A for almond finish to the end of catalog number.

Special or custom colors - See inside back cover for color codes to be added to end of catalog number.

Specify mounting application code when ordering (see page 19).

CDI/CDIR SERIES

Fan-Forced Ceiling Heater

CDI Series Surface Mounting

CDIR Series Recessed Mounting

Downward Discharge Uniform Circulation

The CDI/CDIR ceiling heaters are designed for commercial applications. CDI heaters are designed for surface mounting and can be adapted for T-Bar installation with an optional kit. The CDIR heater is designed for recessed mounting and installation into 2-feet by 2-feet ceiling grids. The CDIR comes with a built-in flange; an additional trim ring kit is not required.

- **Enhanced Performance:** These heaters set new industry standards with ratings up to 10,000 W and 600 CFM in single and three-phase 208, 240 and 480 voltages.
- **Increased Comfort:** The side draw-through inlet with down discharge promotes circulation within the space for uniform temperatures and increased comfort.

Standard Construction Features

Heating Elements – Stainless steel tubular elements with aluminum fins.

Outlet Grille – The grille is made of 20-gauge galvanized steel with a flat ribbon wire outlet grille and is finished with a polyester powder paint in white or almond.

Built-in Controls – Automatic reset thermal cutout and fan delay relay.

Fan Motor – Quiet, direct drive aluminum fan and totally enclosed motor with lifetime lubricated ball bearings.

Installation Requirements – For best performance, ceiling heaters should be installed between 8 and 12-feet above the floor.

Rough In Dimensions – CDIR Only: 23” wide x 23” high x 6” deep

CCI SERIES Commercial Ceiling Heater

The CCI ceiling heater is designed for commercial use in areas where no wall space is available. It provides supplemental heat to prevent cold drafts or wide temperature swings.

- **Extended Capacity:** CCI heaters are available as single or double modules with ratings up to 8,000 W and 320 CFM in 480 volt single-phase.
- **Control Options:** Heaters can be controlled by a building management system with the addition of a low voltage relay.
- **Flexible Mounting:** Units can be surface, (with optional surface mounting box) recessed or installed in T-Bar ceiling systems.

Applications

- Entryways
- Garages
- Hallways
- Restrooms
- Stairwells
- Vestibules

Standard Construction Features

Heating Elements – Steel finned tubular elements.

Outlet Grille – The louvered front grille is made of 18-gauge steel with rounded corners. The grille is finished with a polyester powder paint in white or almond.

Built-in Controls – Automatic reset thermal cutout, fan override with contactor when required.

Fan Motor – Permanently lubricated, open and ventilated fan. The single unit has a 160 CFM fan (55.5 dBA) and the double unit has 2 x 160 CFM fans (58.5 dBA).

Installation Requirements – For best performance, do not install ceiling heaters above recommended maximum mounting height of ten feet. Heater must be installed at least ten inches from adjacent walls.

Rough In Dimensions –

- 1500/1125 - 4800 Watt heaters: 14-7/16" wide x 19-7/8" high x 4-1/8" deep.
- 6000/4500 - 8000 Watt heaters: 30-3/16" wide x 19-7/8" high x 4-1/8" deep.

CLI SERIES Fan-Forced Ceiling Heater

Applications

- Breezeways
- Entryways
- Restrooms
- Small Offices
- Storage Rooms

The CLI ceiling heater is designed for recessed mounting into a ceiling. It provides heat in a quiet, efficient manner. Single units can heat small areas and multiple heaters can be used in large or odd-shaped rooms.

- **Mounting Options:** Units can be surface (with optional box) or recessed mounted. A tapered recess box assures a tight fit when mounted into the wall.

Standard

Special Colors

Standard Construction Features

Housing – The cabinet is 20-gauge steel with a V-shaped recessed box.

Outlet Grille – The louvered front grille is made from 22-gauge steel with rounded corners. The grille is finished with an epoxy/polyester powder paint in white or almond. Optional colors: metallic silver, bronze, metallic charcoal, aluminum, and semi-gloss.

Built-in Controls – Automatic reset thermal cutout.

Fan Motor – Quiet, permanently lubricated axial fan operates at 38 dBA at 40 CFM for models up to 1,000 W and 41.3 dBA at 80 CFM for all models rated above 1,000 W.

Installation Requirements – The air outlet should be installed a minimum of ten inches from the wall and should be oriented towards the center of the room.

Control – Room temperature is controlled by a remote wall mounted thermostat which is sold separately.

Rough In Dimensions – All heaters: 7-3/16" wide x 14-1/8" high x 3" deep.

TSI SERIES

Fan-Forced Toe-Space Heater

Applications

- Checkout Counters
- Reception Areas
- Kitchens
- Ticket/Tollbooths

The TSI heater is designed for installation in places where other heaters do not fit. These heaters can be installed into the toe space or kick space below a cabinet, in the soffit above a cabinet or into risers of a stairway.

- **Multiple Wattage:** Quick disconnect lead wires allow output conversion from 1,000 to 500 watts.
- **Overtemperature Protection:** Automatic and manual reset thermal cutout is provided for primary and secondary overtemperature protection.
- **Two-piece Construction:** Unit is designed for easy installation. The fan, motor and controls are factory assembled into a sheet metal box with a removable front grille.

Standard Construction Features

Heating Elements – Steel finned tubular elements provide durability.

Outlet Grille – Heavy 20-gauge steel grille has a polyester powder paint finish. Standard grille colors include black, white or almond.

Built-in Controls – Heater comes complete with a bi-metal automatic and manual reset thermal cutouts.

Fan Motor – Factory-lubricated fan motor operates at 44.5 dBA with 80 CFM.

Soffit Adapter – Included with the heater.

Installation Requirements – Do not install heater near thermosensitive materials.

Rough In Dimensions – All heaters: 20-1/2" wide x 3-27/32" high x 10-1/2" deep.

Remote Room Thermostat – See page 39.

FFI SERIES

Fan-Forced Floor Heater

The FFI floor heater is compact to fit into tight spaces. It is designed to mount between the floor joists.

- **Unique Design:** The heater features a separate housing and core assembly. The core assembly is completely prewired with leads and an electrical connection plug, which can be removed for service and cleaning without disturbing the housing or field wiring.
- **Safety Screen:** A protective screen prevents foreign objects from falling onto the heating elements or interfering with the fan.

Applications

- Entryways
- Small Rooms
- Open Stairwells
- Under Large Window Areas

Standard Construction Features

Heating Elements – Steel finned tubular elements provide durability.

Housing – Heavy welded 20-gauge steel housing.

Outlet Grille – The 14-gauge steel grille has a polyester powder paint finish. Standard grille colors include bronze, white or almond.

Built-in Controls – Manual reset thermal cutout prevents overheating.

Fan Motor – Quiet, factory-lubricated fan motor operates at 43.9 dBA with 80 CFM.

Installation Requirements – Floor heaters should be installed a minimum of six inches from adjacent walls.

Rough In Dimensions – All heaters: 14-3/8" wide x 7-7/16" high x 8" deep.

AS SERIES Radiant Ceiling Panels

Applications

- Atriums
- Enclosed Walkways
- Entryways
- Hospitals
- Lobbies
- Offices
- Schools
- Warehouses

AS Series radiant panels are ideal for offsetting heat loss through exterior glass on the perimeter of a building. They help to control the problem of condensation typically found with these large exterior glass walls. Radiant panels provide improved comfort by maintaining an even temperature from floor to ceiling.

- **Radiant Heat:** Radiant energy travels in straight lines and is absorbed by objects in the room, warming the space. Air quality is maintained because no forced air movement occurs with radiant heating.
- **Maximize Work Area:** Ceiling mounted panels permit full use of floor and wall space.
- **Maintenance Free:** Radiant panels have no moving parts, so they are maintenance free and can provide years of quiet, safe and clean operation.

Standard Construction Features

Heating Element – High quality alloy resistance wire is electrically insulated with a UL Listed PTFE[®] compound rated for 250°C (482°F). Heating wires are covered with high-efficiency reflective foil.

Panel Design – Panel is made of 22-gauge galvanized steel with a white baked-on powder paint finish. Panel is crimped, not riveted, for improved strength.

Insulation – Each panel contains two inches of high temperature/high density mineral wool insulation.

Electrical – Integrated junction box is built into each panel for field wiring and to connect panels to each other.

Installation Requirements – Heater can be installed in suspended T-bar ceiling systems or can be surface or recessed mounted using optional mounting frames.

Heater comes equipped with four suspension clips. Connecting wire or chain is supplied by customer.

Minimum recommended mounting height is eight feet from the floor.

Rough In Dimensions – for Plaster Mounting Frames only

RCI SERIES Cove Heater

Cove heaters are designed to supply efficient radiant heat. They provide greater comfort at lower temperature settings and can be set up for individual or zone control to reduce energy costs.

Applications

- Classrooms
- Garages
- Hospital Rooms
- Lobbies
- Offices
- Restrooms

- **Radiant Heat:** Radiant energy travels in a straight line from the heater to people and objects in the room, warming the space.
- **Convection Flow:** The design of the heater provides a convection flow from behind and over the top of the unit to circulate warm air into the room.
- **Virtually Maintenance Free:** No moving parts to replace or service.
- **Wall Installation:** For ease of installation, brackets are supplied that do not require the opening of the heater's casing.

Standard Construction Features

Heating Element – Stainless steel tubular heating element.
Housing – Heater has an 18-gauge G-90 galvanized steel frame. Front panel shall be extruded heavy gauge aluminum.
Front Panel – Heater shall be provided with a silichem off-white, matt black, or anodized aluminum finish chosen for radiant heating applications. Additional colors are available to blend in with the decor.

Electrical – Junction boxes with 4" (102mm) ground wires are provided on both ends. Two 7/8" (22mm) knockouts are provided on the back of the heater for ease of wiring. A wireway is provided that is approved for interconnection of units for wall-to-wall applications.

Installation Requirements – Minimum clearances: 6' (1.83m) from the floor; and 4-1/2" (114mm) from ceiling. A variety of accessories are available for wall-to-wall installations.

Remote Room Thermostat – See page 39.

Whether you have a warehouse, dock, or workshop to keep heated, Invizatherm™ is the smart choice. Let the quartz era end and a revolution begin with a zero maintenance heater. You'll never worry about bulbs to replace or reflectors to clean.

With no moving parts to wear out, Invizatherm™ will last you for years to come, all the while giving you safe, clean, energy-efficient heat. There are no combustion products discharged, no flames, and no noxious gases emitted. Meaning there is no need to ventilate.

To top it all off, Invizatherm™ provides the most energy efficient heater in the comfort heat market, converting 95% of the used energy into useful heat.

Standard Features

NO MOVING PARTS - Nothing to break or wear out means the Invizatherm™ is maintenance free.

NO ORANGE GLOW - Never worry about the eyesore of a glowing heater again. Every Invizatherm™ has a clean, black face which does not give off any light, meaning it neatly blends into the background.

USING LOWER WAVELENGTHS - to radiate heat, Invizatherm heaters generate long wavelength heat, which are the most consistent, even, and energy efficient in the industry.

NO REFLECTORS TO CLEAN - No bulbs means no need for reflectors. Another reason Invizatherm™ heaters require zero maintenance.

NO BULBS - Save yourself money and frustration by never having to replace a bulb.

Mounting - Wall mounting bracket is included with each heater.

INVIZATHERM THIN SERIES

Applications

- Restaurants
- Outdoor Patios
- Water and other Treatment Facilities
- Parking Garages
- Indoor Pools
- Hotel Entrances and Valet Stands
- Stadiums and Arenas
- Car Rental Stations

Invizatherm™ Thin includes all of the features and benefits of the Invizatherm™, in a new, slimmer, modern design. Packed with more heat per square inch, the Invizatherm™ Thin is still perfect for all of your heating needs. Ideal for restaurants, outdoor patios, and any other area that needs to keep people warm, the Invizatherm™ Thin does so effectively and discretely.

Like its sister heater, the Invizatherm™ Thin converts 95% of applied energy to useful heat, it contains no bulbs or moving parts to replace, and is maintenance free for the life of the heater. The slim cove design gives Invizatherm™ Thin an attractive commercial or residential appeal, and with three colors to choose from, these heaters blend seamlessly into any space.

Standard Features

NO MOVING PARTS - Nothing to break or wear out means the Invizatherm™ is maintenance free.

NO ORANGE GLOW - Never worry about the eyesore of a glowing heater again. Every Invizatherm™ has a clean, black face which does not give off any light, meaning it neatly blends into the background.

USING LOWER WAVELENGTHS - to radiate heat, Invizatherm heaters generate long wavelength heat, which are the most consistent, even, and energy efficient in the industry.

NO REFLECTORS TO CLEAN - No bulbs means no need for reflectors. Another reason Invizatherm™ heaters require zero maintenance.

NO BULBS - Save yourself money and frustration by never having to replace a bulb.

Mounting - Wall mounting bracket is included with each heater.

Standard color - add BK for black satin finish to the end of the catalog number.

INVIZATHERM THIN SERIES

Invizatherm™ Thin is available with an 18” or 36” heating surface. The heating element is a flat panel IR emitter, which is able to be “cycled” for increased energy efficiency. All Invizatherm™ Thin heaters are UL rated for outdoor use under cover, and come supplied with a rear mounted junction box. The mounting bracket, included, is designed for ceiling or wall mounted locations, and is predesigned for pivoting to safely hang at an angle.

INVIZATHERM SERIES

How to determine the number of heaters you will need

1. You will need to find the approximate square footage of the area you wish to heat.

2. Now that you know how large your space is, use this watts per square foot chart and reference the desired temperature rise. This will help determine the KW that is required to heat your space.

3. After determining the total kW needed for your space, visit the product portion of this catalog to select appropriately sized heaters for your space; keeping in mind voltage, phase, and wattage suitable for your needs. When determining the heater model and quantity that you need for your space, note that both Invizatherm™ and Invizatherm™ Thin can be ceiling or wall mounted. To achieve even heat distribution, we recommend smaller, more evenly spaced heaters throughout your space.

4. If heat control is needed for your area, reference the controls section of this catalog to determine what the best method of heat control is for your area. Note that not all heating control options mentioned in this catalog are suitable for every heater.

**For more information on heater requirements or controls, contact your local distributor or call Indeeco directly to speak with a comfort heat professional.*

CONTROLS

All Invizatherm™ and Invizatherm™ Thin heater models are capable of being regulated or “cycled” to control their heat output. Different methods of control offer varying levels of efficiency so each application should be examined to determine which control method is most suitable. The following pages discuss the Indeeco recommended methods of control in more detail, highlighting the benefits and function of each.

Invizatherm™ and Invizatherm™ Thin heaters do not come with built in controls. The heaters may be installed and operated without controls, in which case a heater is either 100% on, or it is 100% off. This may be acceptable in many applications; however, when controls are needed to regulate temperature or follow a heating schedule, Indeeco offers a variety of manufacturer recommended control options which range from single unit control, all the way to full system commercial and industrial grade control panels. Please contact your Invizatherm™ supplier or a qualified electrician to determine if controls are needed for your heating application.

Control Panel

Indeeco offers a variety of UL listed control panels as the most efficient and effective way to control your Invizatherm™ and Invizatherm Thin™ heaters. Suitable for 120V/240V and 480V heaters in both single and three phase design. Standard panels are equipped to handle up to 4 independently controlled heat zones. See below for a list of standard Indeeco control panel options.

Contact you local sales representative for assistance in sizing your panel.

We will need the following information to size your panel:

- Number of heating zones
- Which model number and the quantity of each heater per zone
- Voltage/phase
- How do you want to control the heaters (built-in or remote color touch screen (specify), line voltage potentiometer on the panel door, or remote low voltage thermostat)

Touch Screen

Indeeco’s remote mounted Touch Screen allows users to access control of the heaters at a convenient location. A 4” color screen allows access to each zone for independent temperature control. All Indeeco remote mounted touch screens are rated for indoor or outdoor use.

CONTROLS

Percent Timer

This 120V/240V 20 Amp Percent Timer offers simple control utilizing Indeeco’s preferred method of “cycling” to regulate heater output. The simple operation of this Percentage Timer makes this unit ideal for regulating your Invizatherm™ and Invizatherm™ Thin heaters. Two dials give the user complete control of the heat output; one controls the cycle time of the heater, and the other controls the amount of time in which the heater is on during that given cycle. For example, if the cycle time is set to 1 minute, and the percent set to 75%; then the heater will be on for 45 seconds, off for 15 seconds, then repeat. This allows precise temperature control while offering optimal heater efficiency. This method of heat control is ideal for areas that need to regulate a consistent temperature.

Timer

This 120V/240V 20 Amp In-Wall Timer gives the user precise control over the length of time a heater is on. Simply turn the dial to the desired time and it will be on for this period. At the end of this set time period, the heater will automatically shut off. This method of control is ideal for areas that are used frequently, but not for extended periods of time.

EASILY CONTROLLED WITH YOUR SMART PHONE

With your Z-Wave HUB set up and your TZ Switches all connected, you can now control your Invizatherm™ and Invizatherm™ Thin heaters from your phone. Easily create a routine for your heaters to turn on or off automatically, or enjoy turning them on and off as needed from the convenience of your phone.

LIMITED WARRANTY

Industrial Engineering and Equipment Company (INDEECO) new products are warranted against defects in workmanship, material, design, labeling and packaging. No other warranty, expressed or implied, written or oral, applies. No person other than an officer or the general manager of INDEECO is authorized to give any other warranty or assume any liability.

WARRANTY PERIOD

This warranty is effective for eighteen months from the date of shipment of the product from INDEECO's factory, or for twelve months from the date the product is first placed into service, whichever period lapses first.

CONDITIONS OF WARRANTY

INDEECO products must be installed, operated, and maintained in accordance with INDEECO's instructions. INDEECO is not liable for damage or unsatisfactory performance of the product resulting from accident, negligence, alteration, unauthorized repair, improper application or installation of the product, improper specifications, or corrosion. INDEECO IS NOT LIABLE FOR ANY INCIDENTAL OR CONSEQUENTIAL DAMAGES. Claims against carriers for damage in transit must be filed by the purchaser with the carrier.

REMEDY

Contact INDEECO at (314) 644-4300, for a Return Material Authorization Number (RMA#) and return instructions.

If after receipt of the product and the claim, INDEECO finds to its reasonable satisfaction that the product is defective in workmanship, material, design, labeling or packaging, the product will be repaired or replaced, or the purchase price refunded at INDEECO's option. There will be no charge to the purchaser for parts or labor. Removal and reinstallation of the product, and shipment of the product to INDEECO for repair or inspection, shall be at the purchaser's risk and expense.

THE REPAIR, REPLACEMENT, OR REFUND PROVIDED FOR IN THIS LIMITED WARRANTY IS THE EXCLUSIVE REMEDY OF THE PURCHASER. THIS WARRANTY IS EXPRESSLY IN LIEU OF ANY OTHER, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. THERE ARE NO WARRANTIES WHICH EXTEND BEYOND THE TERMS OF THIS LIMITED WARRANTY.
